PRODUCT DESIGN

Activity Discovery Platform

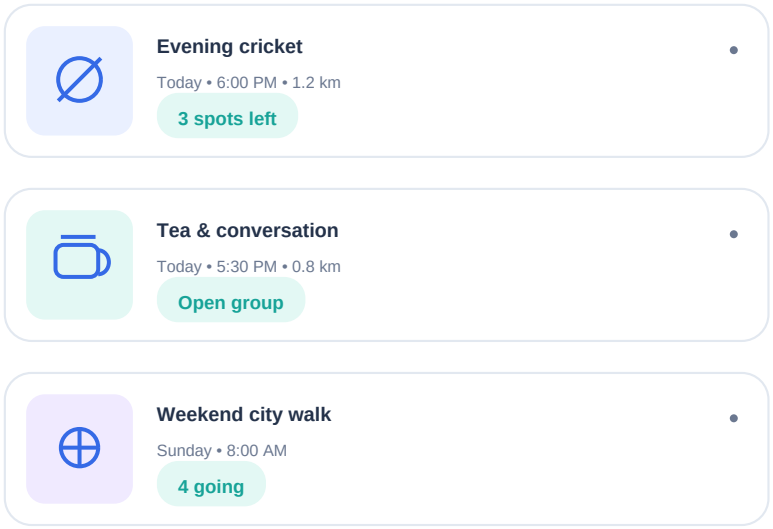
A mobile-first experience for discovering people, creating plans, joining small groups, and coordinating safely.
plans, joining small groups, and coordinating safely.

MOBILE-FIRST

COMMUNITY

Find your people. Make a plan.

UI direction: friendly, clear, safe, action-oriented



Design principle: discovery first, details transparent, joining controlled by the host.

1. Product structure & navigation

Information architecture and primary navigation

INFORMATION ARCHITECTURE

Explore

Recommended activities, search, filters, map/list toggle
Recommended activities, search, filters, map/list toggle

Activity details

Host, time, approximate location, spots, rules, join request
Host, time, approximate location, spots, rules, join request

Create

Category, title, date/time, meeting point, capacity, visibility
Category, title, date/time, meeting point, capacity, visibility

Requests

Pending requests, approve/reject, participant list
Pending requests, approve/reject, participant list

Inbox

Activity group chats, unread messages, system notifications
Activity group chats, unread messages, system notifications

Profile

Interests, preferences, activity history, safety controls
Interests, preferences, activity history, safety controls

Safety

Block, report, privacy, moderation outcomes
Block, report, privacy, moderation outcomes

BOTTOM NAVIGATION

Explore	Discover activities and filter results
Create	Start a new activity with a guided form
Inbox	Chats, join-request updates, notifications
Profile	Interests, history, privacy and account

UX rules

Keep the primary action visible. Use plain-language statuses. Show approximate location before approval; reveal exact meeting details only when appropriate. Never send unsolicited mass invitations to every user with a shared interest.
meeting details only when appropriate. Never send unsolicited mass invitations to every user with a shared interest.

2. Visual design system

A consistent, accessible component language for the mobile app

COLOR PALETTE

DESIGN PRINCIPLES

Trust by default

Verified contact methods, host details, visible group rules and report/block controls.
Verified contact methods, host details, visible group rules and report/block controls.

Progressive disclosure

Ask only for what is needed at each step; show more detail as the user proceeds.
Ask only for what is needed at each step; show more detail as the user proceeds.

Accessible interactions

Readable contrast, 44×44 pt touch targets, labels plus icons, dynamic text support.
Readable contrast, 44×44 pt touch targets, labels plus icons, dynamic text support.

Clear system feedback

Explain loading, empty, success, failure, pending approval, full, and cancelled states.
Explain loading, empty, success, failure, pending approval, full, and cancelled states.

WHAT THIS SCREEN MUST DO

Search first

Search by activity, category, or keyword.
Search by activity, category, or keyword.

Fast filters

Time, distance, category, available spots, and accessibility.
Time, distance, category, available spots, and accessibility.

Transparent cards

Show time, approximate distance, spots remaining, and group status.
Show time, approximate distance, spots remaining, and group status.

Personalized but respectful

Rank by interests and preferences; never imply users are obligated to join.
Rank by interests and preferences; never imply users are obligated to join.

Useful empty state

If no results match, suggest widening time/distance or creating an activity.
If no results match, suggest widening time/distance or creating an activity.

Main CTA: tap an activity card to inspect details before requesting to join.

4. Screen concept — Activity details

Make the plan, host, participation rules, and next action obvious

Arjun • 4.8 host feedback (example)

Be respectful • arrive on time • no spam

Request to join

Evening cricket

Sports • Created by Arjun

DETAILS & TRUST CHECKLIST

Before approval

Show approximate meeting location; don't expose private contact details.
Show approximate meeting location; don't expose private contact details.

Capacity

Show confirmed count and remaining spots; don't count pending requests as confirmed.
Show confirmed count and remaining spots; don't count pending requests as confirmed.

Host controls

View host profile, activity history, rules, and report/block actions.
View host profile, activity history, rules, and report/block actions.

Join state

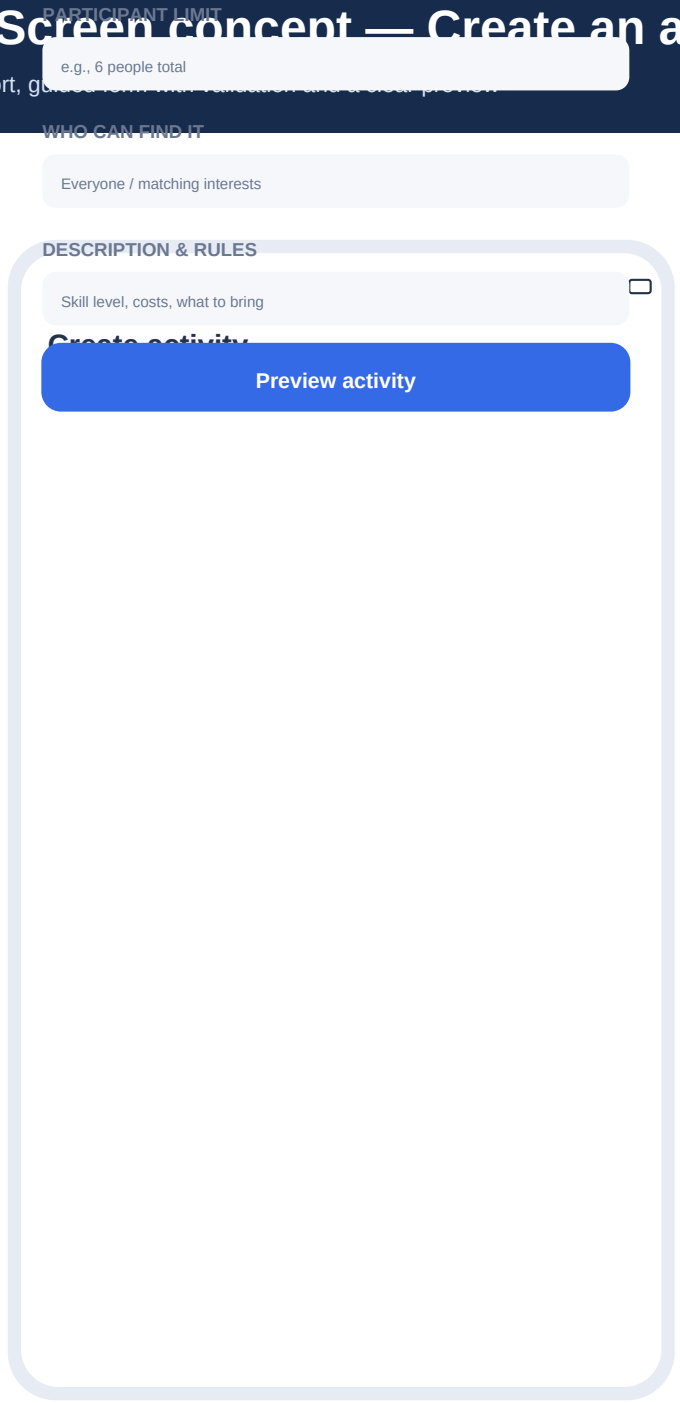
Button changes to Pending approval, Joined, Full, or Closed as appropriate.
Button changes to Pending approval, Joined, Full, or Closed as appropriate.

After approval

Reveal exact meeting instructions only when suitable; enable activity group chat.
Reveal exact meeting instructions only when suitable; enable activity group chat.

5. Screen concept — Create an activity

A short, guided form with validation and a clear preview.



FORM BEHAVIOR

Required fields

Category, title, date/time, meeting point, capacity, and visibility.
Category, title, date/time, meeting point, capacity, and visibility.

Validation

Prevent past dates, end time before start time, invalid capacity, and missing location.
Prevent past dates, end time before start time, invalid capacity, and missing location.

Capacity semantics

Clarify whether host counts toward the total participant limit.
Clarify whether host counts toward the total participant limit.

Privacy

Offer public-place selection and explain location visibility before publishing.
Offer public-place selection and explain location visibility before publishing.

Draft safety

Save as draft when the user leaves; show a preview before publish.
Save as draft when the user leaves; show a preview before publish.

6. Screen concept — Host requests & group chat

Keep
